DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed December 29, 2004 have been acknowledged.
2. Examiner acknowledges amended claims 6-8.
3. Examiner acknowledges newly added claims 28-33
4. The rejection of claim 6 under 35 U.S.C. 102(b) as being anticipated by JP 63-174922 is withdrawn due to applicant's amended claim 6.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1774

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 7-9, 11-14, 16-21 and 23-33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2 and 10-20 of U.S. Patent No. 6,565,995. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the present invention and the patent recite a composition that comprises 5% to 95% by weight Tb(TMHD)₃OPNP and a hole transporting polymer such as polyvinyl carbazole wherein the composition can be used in an electroluminescent device that also comprises an anode, cathode and hole transporting layer. Additionally, both the present invention and the patent recite an electroluminescent layer that includes a dye. Both the present invention and the patent recite an electron injecting material in the electroluminescent layer wherein the electron injecting material can be an aluminum quinolate.

7. Claim 6 is allowed. The prior art does not provide for an electroluminescent device which comprises (i) a transparent substrate (ii) an electroluminescent layer comprising Eu(II)(TMHD)₂ and (iii) a cathode.

Response to Arguments

8. Applicant's arguments with respect to claims 6-9, 11-14, 16-21 and 23-33 have been considered but are moot in view of the new ground(s) of rejection.

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
